JONATHAN WIJAYA

Full-Stack Developer | Software Engineer

Yogyakarta, Indonesia | jonathanwijaya156@gmail.com| github.com/jonathanwijayaa | linkedin.com/in/jonathanwijayaa | jonathanwijaya-portfolio.vercel.app/

PROFESSIONAL SUMMARY

Informatics graduate (GPA 3.69/4.00) specializing in full-stack web development with a strong frontend foundation. Experienced in building web applications using React.js, TypeScript, Node.js, and PostgreSQL, including a multi-role LMS during an internship at Study First and a civic-tech volunteer-data platform developed in collaboration with BAPPEDA Yogyakarta stakeholders. Skilled in frontend engineering, database design, role-based access control, and usability testing. I learn quickly, communicate clearly in English, and enjoy turning real-world requirements into reliable software.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Java, Kotlin, HTML, CSS, Python, PHP, C#
Frontend: React.js, Tailwind CSS, Axios, Context API, Zustand, TanStack Query
Backend: Node.js, PHP, REST API, PostgreSQL, Firebase, Supabase, SQLite
Tools & Cloud: Git, Github, Figma, Vercel, Visual Studio Code
Practices: Agile/Scrum, algorithms & data structures, object-oriented programming (OOP), RESTful API design, SDLC, secure coding awareness, testing & debugging, performance optimisation, CI/CD

EDUCATION

Bachelor of Informatics - Duta Wacana Christian University (UKDW) **Aug 2022 – July 2026**
GPA: 3.69/4.00 | Coursework: Data Structures & Algorithms, Database Systems, Computer Networks, Software Quality Assurance, Web Development, Mobile Development

PROFESSIONAL EXPERIENCE

Web Developer Intern, Studyfirst **Sep 2025 - Dec 2025**

- Engineered a multi-role LMS using **React.js**, **TypeScript**, **Tailwind CSS**, and **Zustand**, building reusable **role-based components**; architected **backend services** with **Supabase** including **database** schema design, **Row Level Security** (RLS), file storage, and role-based authentication across 3 user tiers.
- Translated **Figma wireframes** into pixel-accurate IELTS landing page, coordinating with Product and Design teams to meet specific user requirements and operational business processes.
- Managed the publication of **17+** SEO-optimised articles in **coordination** with Marketing and HR teams to ensure timely content publishing.

Assistant Lecturer, Universitas Kristen Duta Wacana **Feb 2024 - Jun 2026**

- Facilitated lab sessions for core courses including **Software Quality Assurance**, **Database Systems**, and **Web Development** for classes of up to 40 students including hands-on instruction in **HTML**, **CSS**, **JavaScript**, and **PHP**.
- Designed 20+ practical lab modules covering **Database Systems** and **Web Development** to simulate real-world engineering scenarios through structured hands-on guidance and technical troubleshooting during sessions.
- Evaluated 700+ **technical submissions**, delivering individualised feedback on code quality, system configurations, and debugging strategies aligned with learning outcomes.

PROJECTS

Chatbot Kafe Jogja - Full-stack Developer **Jun 2026 – Jul 2026**

- Built an **AI-powered** café recommendation chatbot for Yogyakarta using **React.js**, **TypeScript**, and **Gemini API**, featuring a conversational UI deployed on Vercel.
- Implemented content **guardrails**, including topic restriction and profanity filtering, to ensure safe and on-topic responses.
- Configured system instruction and model parameter to control response tone and accuracy.

Aplikasi Data Relawan Kota Yogyakarta – UI/UX Designer & Front-end Developer **Sept 2025 – Jul 2026**

- Developed the frontend of a government volunteer-data management platform using **React.js**, **TypeScript**, **Tailwind CSS**, **Axios**, and **TanStack Query**, collaborating directly with BAPPEDA stakeholders to gather and define technical requirements.
- Designed high-fidelity **Figma prototypes** applying user-centred design principles and translated them into **reusable**, **responsive components,** with an Excel import workflow for **parsing** inconsistent data formats and handling missing values to streamline volunteer **data processing**.
- Designed and conducted usability testing with **17 participants** across three user groups and **156 task attempts**, recording a **98.72%** Task Completion Rate, alongside **Time on Task** measurements, **System Usability Scale**, and **User Experience Questionnaire** evaluations.

Sealnote – Android Developer & UI/UX Designer **Feb 2025 – Jun 2025**

- Built a privacy-first Android note-taking app in **Kotlin** and **Jetpack Compose** featuring a "Stealth Calculator" disguise UI and **Material Design 3**.
- Engineered multi-layered security with **biometric authentication** (Fingerprint/Face ID) and **Google Sign-In (OAuth 2.0 / SSO)**; integrated **Firebase** for **encrypted** data synchronisation, media management, and **token-based** session handling.

VoQ – Java Developer **Mar 2024 – Jun 2024**

- Developed a desktop voucher management application using **Java** and **JavaFX** with **SQLite** database, implementing full **CRUD operations** for voucher data persistence and retrieval.

LEADERSHIP, ORGANIZATION & VOLUNTEER EXPERIENCE

Google Student Ambassador – Campus Ambassador & Community Builder **Sep 2025 – Dec 2025**

Served as official liaison between Google and UKDW, driving adoption of Google developer tools and GCP through peer-to-peer workshops and technical mentoring.

HMTI UKDW Yogyakarta – Secretary **Feb 2024 – Jan 2025**

Managed workflows for 20+ members with 95% data accuracy across 100+ official documents; coordinated weekly standups and ensured consistent on-time delivery of organisational objectives.
